

## BH-38 INTENSIVE LIQUID CLEANER

BH-38 COMPLIES WITH SANS. 1344 (see test report)

BH-38 COMPLIES WITH SANS. 1828

BH-38 = No ammonia, no caustic, no abrasives.

BH-38 is a heavy duty, industrial and commercial, butyl based detergent, formulated to easily and economically clean a large variety of industrial and domestic areas.

BH-38 may be safely used wherever food is prepared or packaged.

**VERSATILITY** -The user will note directions underneath for use in a remarkable variety of applications.

**LOW FOAMING** - wetting agents permit BH-38 to be used in industrial pressure washers and automatic scrubbers.

**ECONOMICAL** -The cleaning action of BH-38 is **remarkably fast**, thereby **reducing** the time needed for **normal labour** requirements. Consequent labour cost saving and cleaning efficiency results.

**SAFE** - **BH-38** is a water soluble formulation, therefore, it is **non-flammable**. Also incorporated in the formulation are inorganic metal corrosion inhibitors, enabling the product to be **non-corrosive** on iron and mild steel surfaces, and **has no attack on aluminium, paint, perspex, glass or plastic**.

**BH-38 is free of ammonia and contains no abrasive substances.**

### **DIRECTIONS FOR USE:**

BH-38 is a most versatile product. It may be applied using sprayers, brushes, or mops, depending on the surface to be cleaned. We recommend the user to experiment with BH-38 before establishing a cleaning procedure- in any case because of the product's remarkable effectiveness; a higher dilution will accomplish the task thereby providing greater economy.

After the cleaning task is complete, the surface should be thoroughly rinsed.

BH-38 may be used	HIGH PRESSURE WASHERS	AUTOMATIC FLOOR
with:		SCRUBBERS
	DIP AND SOAK TANKS	MOPS AND BRUSHES

Although BH-38 is made for low to medium dilutions with water, it is recommended to first experiment with the ratio of dilution to be used. However, the following guide is for the more common uses of BH-38:

	BH-38	WATER
Air conditioning ducts and grilles	1 part	5 parts
Air filters	1	2
Appliances, light fittings	1	10
Brick, concrete	1	2
Carpets (wet-vac machines)	1	25
Conveyors	1	4
Collars and cuffs	1	1
Diesel Generators, machinery	1	2
Flues, hoods	1	2
Kitchen walls, tiles, marble etc.	1	7
Shower stalls	1	1
Office machines	1	2
Printing presses	1	4
Rubber clothing	1	3
Stainless steel surfaces	1	10

**BH-38 CLEANS IMPOSSIBLE PLACES FAST AND EASILY!****PHYSICAL DATA**

Total active agents	- 16.0%
pH (concentration)	- 12.0 – 12.5
Viscosity	- Water thin at 24°C
Cloud Point	- Clear to 30°C
Solvents	- Butoxyethanol
Free Oil	- None
Flash Point	- None
Storage stability	- Shelf life at 24° C, one year minimum. - Accelerated at 49° C, 60 days. - Product will stand one freeze/thaw cycle
Miscibility	- Completely soluble in all ratios with hot or cold water. - Forms emulsions with oils and water-insoluble solvents.
Rinsability	- Rinses freely with hot or cold water. Leaves no film or objectionable odours and is free from abrasives.
Foamability	- Low
Meets SABS 1344	- Yes
Meets SABS 1828	- Yes
Attack on aluminium	- None
Attack on mild steel	- None
Environment	- When used in the prescribed manner at the recommended dilutions the product will not be harmful to the environment.

**BH-38 IS MADE UNDER THE STRICT CONTROL OF  
REINOL-JANEK CHEMICALS (PTY) LTD. SA
